

For the team

Everything you can do, and where to look for it

This is everything on the bot that is yours to use. If a command is not on this sheet, it is somebody else's job — you will not be missing anything by not knowing it.

If you only remember three

/go

What is waiting on you right now. Run it first.

/desk me

Your work, deadlines and pay in one place.

/find

When you half-remember a name or a code and cannot recall the command.

Finding your way around

/desk — Your work in one place

/desk me	Your offers, assignments, deadlines and pay
-----------------	---

/desk web-link	A one-time link to open your desk in a browser
-----------------------	--

/find <i>needs query</i>	Search everything at once — work, orders, clients, people, files
------------------------------------	--

/go	What is waiting on you right now
------------	----------------------------------

/help	What you can do with this bot
--------------	-------------------------------

Work and deadlines

/plan — Templates, dependencies, blockers and deadline changes

/plan templates	Saved task templates
------------------------	----------------------

/plan chain <i>needs task</i>	Show what a task waits on and what waits on it
---	--

/plan risks	Work whose prerequisite is late
--------------------	---------------------------------

/plan ready <i>needs task</i>	Check whether a task is complete enough to offer
---	--

/plan blockers	Open blockers across your departments
-----------------------	---------------------------------------

/plan clear-blocker <i>needs id</i>	Mark a blocker resolved
/plan extensions	Deadline requests waiting on a decision
/task — Tasks, assignment and pay	
/task view <i>needs task</i>	Show a task
/task mine	Your offers and current assignments
/work — Post progress and submit finished work	
/work progress <i>needs task, note</i>	Post a progress update on a task you hold
/work submit <i>needs task</i>	Submit finished work for internal review
/work history <i>needs task</i>	Submissions, reviews and client decisions on a task
/work blocked <i>needs task, reason</i>	Say you cannot continue, and why
/work unblock <i>needs task</i>	Say a blocker you raised is resolved
/work earnings	Your own pay and payment history (private)

Money

/bonus — Milestone bonuses: rules, what has been earned, and approvals	
/bonus mine	Your own bonus progress and awards
/contrib — People sharing one task, and what each of them is paid	
/contrib list <i>needs task</i>	Who is on a task, and what each is owed

People and time

/procedure — Studio procedures and acknowledgements	
/procedure list	Procedures that apply to you, and which you still owe
/procedure read <i>needs key</i>	Read one, with a button to acknowledge it
/profile — Your studio profile: timezone, availability, specialties and hours	
/profile me	Open your profile to fill in or edit it

/profile view

needs member

View a staff member's profile

/profile timezone

needs timezone

Set your timezone

/profile availability

needs status

Say whether you are accepting work (separate from being online)

/time — Local times for staff, using each person's own timezone

/time member

needs member

Show a staff member's current local date and time

/time department

Show local times across a department

/trial — Trial briefs for people the studio is considering

/trial submit

needs code, links

Submit your trial work

/trial mine

Your own trial briefs

Clients and orders

/outreach — Automated client messages: templates, queue and history

/outreach placeholders

Every value a template may use

/project — Client projects and their tasks

/project view

needs project

Show a project

/project list

List projects

/project tasks

needs project

List the tasks on a project

Files and proof

/archive — Search past work and manage portfolio permission

/archive search

Find files across past work

/archive portfolio

What the studio may publish right now

/archive roblox-ids

needs project

Every Roblox asset ID recorded on an order

Keeping an eye on things

/escalate — Raise a concern privately, or handle raised concerns

/escalate raise Raise a concern about an assignment, your pay or your workload
needs category, subject, details

/escalate mine Concerns you have raised and where they stand

Where things show up

The staff info board channel

One message per department, listing who is in it, what each person has on, and their local time. The bot edits these in place and refreshes them on a timer — they are never re-posted, so the channel stays clean.

Read-only. Nobody types anything here.

Your DMs

Task offers with Accept and Decline buttons, pay decisions, deadline reminders, and anything that needs you personally.

If your DMs are closed the bot posts it to the private staff channel instead, so it is never silently lost. Open your DMs to this server.

/desk me

Everything of yours in one place: offers waiting, what you hold, deadlines, and your pay. This is the one to run each morning.

Private to you — only you see the reply.

The task channel or thread

Progress updates you post with /work progress, so the people watching an order can see it move.

Your browser

/desk web-link gives you a one-time link to the same desk in a browser, read-only.

The link expires. Ask for a new one whenever you need it.

Worth knowing

Open your DMs to this server

Task offers arrive by DM. With DMs closed they go to the private staff channel instead, which is slower and easier to miss.

Set your timezone once

/profile timezone. Without it your deadlines are read as UTC and land hours out.

Say when you are away

/profile availability with a return date. It stops work being offered to you while you are gone.
